

# \$5 Fiddle Workshops

## Cross Tuning

### Things to Keep In Mind:

1. Steel Strings Adjust Quicker than Nylon Core Strings
2. String Tension Matters. Be Careful when tuning up (higher pitches) with high tension strings.
3. All of the strings will need adjusted after changing tuning.
4. New tunings take a little while to settle in. (adjust, adjust, adjust)

### Common Alternate Tunings:

AEAE

AEAC#

GDGD

DDAD

EDAE

## Midnight on the Water (DDAD)
